

Ugly Ducks in purchasing: waste ...

The waste and recycling business is very fast moving; this results in new techniques and solutions not always being shared with the customer and as a consequence, invoices for waste-streams are often far too high. Depending on your business sector, waste can claim 1% to 5% of the total buying budget. However, a waste audit can achieve savings from 15% to 45% on the waste budget www.phidan.be/cases.html

Tendering chemical bulk liquids: more than buying trucks and trailers ...

Recently, a tender process was performed to source and contract road transport services. The products were bulk liquid petrochemicals (dangerous and non-dangerous goods) and liquefied gasses. With such scope, It is much more than just asking for a quote www.phidan.be/cases.html

PHIprofiler—your Supply Chain DNA: new version launched on April 24th...

Based on many years of Supply Chain Management experience, Phidan developed the PHIprofiler as a tool to profile your supply chain department on its development path. The user-friendly PHIprofiler allows you to make a fast and comprehensive profile of your Supply Chain department, individuals as well as groups within a broader context. The profile is followed by action schemes and implementation plans to help you develop and execute your projects efficiently. On 24 April 2009 this completely updated version will be launched at Kasteel Ter Ham in Steenokkerzeel.... more on www.phidan.be
